

How to turn any applique design into a coaster

Instructions:

1. Hoop 1 layer of Wet N Gone
2. Run first outline color of the applique design
3. Lay 1 layer of Stitch N Shape with your applique fabric facing up
4. Run second outline color
5. Remove hoop and trim close to the stitches
6. Run all colors until you reach the color of the finishing satin stitches going around the shape. Stop the machine, slip a piece of felt or fabric for the backing.
7. Start the color for the satin stitches. Let the machine stitch out the underlay stitches. Stop the machine. Trim the backing fabric close to the underlay stitches.
8. Place the hoop back on the machine and run the remaining stitches.
9. Dissolve the stabilizer and you have a coaster.

Hope you find this helpful
